What will I learn?

We'll help you look at the bigger picture when it comes to your health.

1. Nutrition

Discover how to improve your diet by learning more about portion sizes, decoding food labels and how to make informed food choices to boost your health.

2. Movement

Find out about the different ways to enjoy being active and how you can set movement habits that last.

3. Mindset

Learn ways to approach habit change and tap into your inner motivation.

REDUCE YOUR RISK OF TYPE 2 DIABETES

Start the journey to a

HEALTHIER YOU

NHS DIABETES PREVENTION PROGRAMME

#PREVENTINGTYPE2

More than 200,000 people are diagnosed with type 2 diabetes every year – and that means the risk of potentially serious health complications and early death.

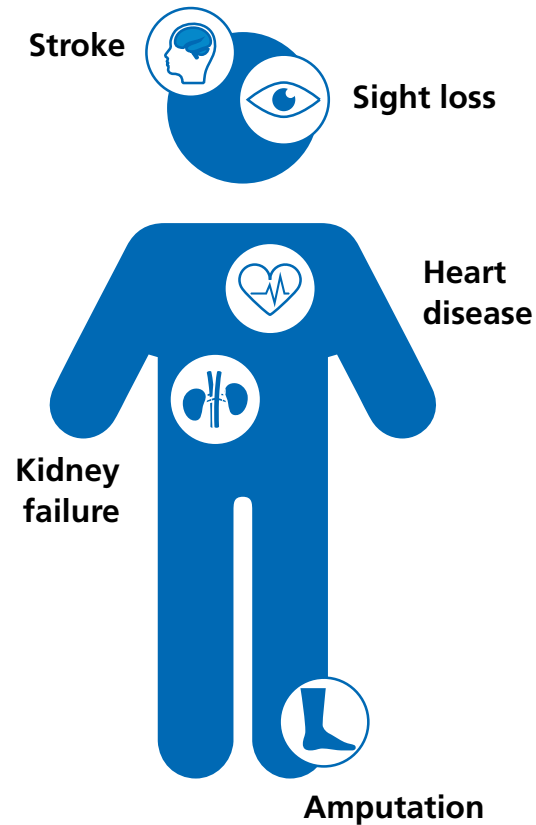

Modern life can make it hard to be healthy but for many people type 2 diabetes can be prevented by making small lifestyle changes.

Diabetes is a leading cause of sight loss in people of working age. It is also responsible for most cases of kidney failure and lower limb amputation (other than accidents), and people with diabetes are up to five times more likely to develop heart disease or have a stroke than those without diabetes.

However, type 2 diabetes can be prevented by:

- Managing your weight,
- Eating healthily and
- Being more active.

Effects of diabetes

Making small changes to your lifestyle now can make a big impact on your future health – and having experts to help you make the right choices along the way can make it even easier.

The Healthier You NHS Diabetes Prevention Programme (DPP) is a free 9 month programme for those who are at risk of developing type 2 diabetes.

Through behaviour change support and education around nutrition, movement, mindset, alcohol & sleep you will learn to make small healthy changes that will significantly reduce your risk of developing type 2 diabetes.

To register for your local programme ask your GP Practice, or other health care professional to fill in the information below:

Blood Test Result

(either your HbA1c or FPG reading)

Date of Blood Test

(must be within the past 12 months)

NHS Number
